

# SBOM Checker - Terms of Service

Operated by AC6. Please read these terms before creating an account.

## 1. Service

SBOM Checker analyzes Software Bills of Materials (SBOM) and binary artifacts using multiple open-source engines and public vulnerability data sources. It reports factual findings: inventory, metadata quality, NTIA conformance, known vulnerabilities, known-exploited status and exploit probability.

## 2. No warranty and no certification

The service is provided as is, without warranty of any kind. Results are informational and do not constitute legal certification, guaranteed compliance, or regulatory approval. You remain responsible for your own security and compliance decisions.

## 3. Accounts

You are responsible for the confidentiality of your account credentials and for all activity under your account. Use a strong, unique password and enable two-factor authentication. Notify us of any unauthorized use.

## 4. Your data

SBOMs and artifacts you upload, and the scans you run while signed in, are stored to provide your scan history and continuous monitoring. Scans are unlisted: a result is reachable only by its secret link or by the account that owns it. Stored data may be deleted according to the configured retention policy. You may delete your own scans at any time.

## 5. Acceptable use

Upload only content you are authorized to analyze. Do not attempt to disrupt the service, circumvent rate limits, or access other users' data. Automated access through the API must respect published limits.

## 6. Email

We collect your email address to enable account recovery (password reset) and security notifications. We do not sell your email address.

## 7. Changes

These terms may be updated. Continued use after an update constitutes acceptance of the revised terms.

## 8. Contact

Questions about these terms: [contact@ac6.fr](mailto:contact@ac6.fr)

By creating an account you confirm that you have read and accepted these terms.
